

Quantedge Capital IT Infrastructure Engineer Singapore

Quantedge manages more than USD 4 billion and has an 18-year track record of outstanding performance. We have offices in Singapore and New York City. Our organization is flat, collaborative, and results-oriented, offering significant opportunities for advancement to driven team players. We invest heavily in the career development of our employees, maintain a sustainable work-life balance and offer generous compensation and benefits.

The Technology team is seeking an experienced engineer to design, implement, and maintain our IT systems. The ideal candidate will demonstrate deep technical expertise, a proactive approach to problem-solving, and the ability to manage multiple projects in a dynamic, fast-paced environment.

What we're looking for:

- 2 to 6 years of relevant IT experience in a corporate environment
- Proven experience managing data centers, including both physical and virtual infrastructures
- Advanced knowledge of hypervisors, virtualization, backup solutions, and server-related operating systems (Windows and Unix/Linux)
- Strong understanding of networking fundamentals—including routing, switching, firewall configuration, and network security—to support overall infrastructure
- Excellent analytical skills with the ability to quickly diagnose and resolve complex infrastructure issues
- Proven ability to plan and execute infrastructure upgrades and improvements
- Familiarity with cloud infrastructure management and design
- Familiarity with information security best practices
- Excellent communication skills, with the ability to convey technical information effectively and clearly
